**NEW MOON - ENTERING 2012
In the Light of Birch - Beth**

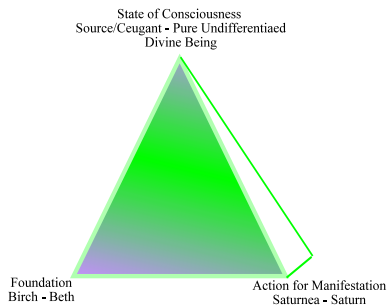

On December 24th, 2011 we enter a New Moon Phase. The time will be: 10:06:23 a.m. Pacific Standard Time. It is the Light of the Divine Feminine emanating through a lunar cycle known to us as, Birch-Beth. As students and practitioners of the Divine Feminine Principle, we see this New Moon as instigating the vibration of a New Year, and although it is starting in December of 2011, it is the vibration of 2012 being seeded and readied for birth. What does the Divine Presence have in store for us? What will we, the individual consciousness, creating in this very moment?

Each year WomanSpirit brings a message of what we are to glean from Her Paradigm of the New World of Consciousness throughout the cycles of a Lunar Year. This year it is the Theme of: Trinity, Triad, 3-in-1, Spirit-Ethereal-Matter. This theme is used to assist us in exploring, aligning, and Be-ing the paradox of Oneness. It calls us to know who we are: Spirit, Ethereal and Matter, yet absolutely the One Holy Spirit. Using the sacred wisdom of THE FACES OF WOMANSPirit, A Celtic Oracle of Avalon, we open to a Book of Life throughout the year that will help us gather more awareness of the Three-in-One paradox.

Each depiction of the Paradox of Oneness will be explored throughout the year through the Stage of Consciousness we see as the Four Worlds, the Lunar Light, and the supporting and activating Planetary Energy. For this Lunar Cycle bring out the Source Card, Birch and Saturnea.

Holy Energies of the Lunar Cycle of Birch

Ceugant - Source State of Consciousness:

As we enter into this time of Birch, we align with the Origination of All Conscious States....Source. When we meditate, we make use of our personal mind to focus on the intention to become One With Source Mind and know that in that very moment a consecration occurs. We choose to expand our consciousness. All that We Are, Have Been and Will Be is Holy. We recognize we are in the Region of All Knowing. We

are also in the Region of Origination and the moment of creating Original Expressions for 2012 can occur. In fact it is at this moment that we can create a New Covenant with Source Consciousness for the evolution of 2012 and our Higher State of Be-ing . (A Covenant is a Contract—what are you contracting with the Highest Order of Yourself to Create and Manifest in 2012?)

In this State of Consciousness, we are Causal Vibration and it is important to know the power that we are exuding. It is the Power of Creating from all levels of our Being. We are creating from our Spiritual-All Knowing, We are Creating from our Thoughts, our Emotions and our Actions. Care is called forth by consciously using the power of *True Dedication* to be clear in Mind, Feeling, and Responses through all levels of our self. Whatever we do we must be diligent, fully aware of all our S.E.M.P.E.S. so we may create the Perfect Outcome of Source-Soul desires urging the qualities of the New Year ahead of us to be successfully manifested.

As we begin this new year, we are able to access the 3rd and 4th Pyramid of Consciousness. The third pyramid calls the soul to higher aspirations and creates the blessings of Devotion to the Greater Work. We are (and have been) glimpsing the energy of this pyramid for a long time. We are now finding that more souls are gravitating to these states of consciousness and therefore the bridge of light is much stronger, more inviting, and energetically pulling the majority along this path of evolution.

Through the 3rd pyramid of consciousness, we turn to compassionate detachment. We are discovering a love for the world, humanity, and the Divine in new ways of awareness. We have an opportunity to come to World Consciousness and realize the Interdependency is a reality that creates balance within selves and the Earth. We know we are a community in a single dwelling. All are us, and we are they.

We learn that our ego is not the ruler of our reality, nor is our mind. We are coming into a wholeness within ourselves. No longer do we have to live through veils of being okay or not being okay based on judgement from others—we know we are a sacred expression of the Whole. This helps unlock the doorway to the 3rd pyramid.

Experiences of the higher nature of pyramid three include unselfishness, understanding the power of faith, devotion, and the search for attainment of union with Source. In this pyramid, we find a greater compassion reigns and individuals such as Jesus of Nazareth, Buddha, Gandhi, and Saints of all religions lead the way. They are examples to honor and follow. The greater opening of Love is explored and experienced without doubt of ones' own reality being annihilated.

Only recently has the "view" of the 4th pyramid been seen in the ethers of our soul-journey. We are heading toward it by the leap of time, space and matter as it speeds into union with anti-matter, no time and no space. A New World is emerging from within this collision; a new world that exists in the realm of no matter, no time, no space, no gravity and is birthing in the realm of matter, time and space.

The cogs of wheels-of-life (Spirit differentiated and Spirit undifferentiated) are coming together in the Spiral of Intention of Oneness.

This is a state of consciousness in which the Many recognize they are The One. The compassion is beyond comprehension. Love beyond measure. The Union beyond our description.

In this 4th pyramid or state of conscious-living is the experience of the full awareness of being Source. It is the Wave of Love that is constant. The shimmering light of Be-ing is recognizable.

With this knowledge we know there is a great and powerful energy to use to Initiate the New Year. A time to plant our thoughts and emotions into the Soil of Spirit and know that the unfolding year ahead is Already Created as a Holy and Complete Experience of Perfectedness.

In the Mystical Wisdom of **Source** we find vibrations that correspond to the Sacred Number 33 and the Law of Selflessness. This law reveals Sacred Love. It is the Unselfish expression of Source. It carries the ultimate Service: To support, honor, and provide all that can be given when one opens their free will and choice to receiving. Mystics realized their act of selflessness opened them to the Union of Oneness. The Number 33 aligns us with the power to: **Master Selflessness**. The person who reaches this state of consciousness has awakened to compassion, ability to give and receive without attachment, and the generous knowing that all life flows together as One. Here the great healer emerges and presents the true unconditional love energy to All.

Foundation: Birch-Beth: As we enter the Lunar cycle of this new year, of course, we connect with the Moon of the Great Mother known as Birch. The word, Foundation, means to be stabilized and filled with All that is necessary to carry out the Missions of one's Soul Intentions. As we connect with Birch, we recognize that the Missions are established in Source, pour forth into the Soul of Individuality and expressed through the Person as the Individualized expression of Source.

The foundation of Birch aligns with the New Paradigm of the New World. It calls forth the power of the RNA/DNA to take up the higher vibrations of Shimmering Oneness. It calls forth the activation in the Cells of All to "recall and live" the power of the True Self. The Time is Now, the experience is the Present, and the Manifestation is All Time.

To assist in stabilizing the foundation for yourself, you simply need to maintain an awareness of a few things:

- ★ Keep your vision succinct...because you are revealing what Already Is
- ★ Be like the Shaman and Dream your vision into existence
- ★ Maintain your Knowing that All already IS
- ★ Do not sway, for you are anchoring the RNA/DNA of the New World of your 2012 manifestations
- ★ Your potentials of 2012 are anchored by your Thoughts, Emotions and Actions and will be stabilized by your willingness to maintain Balance, Faith, Patience.

Birch relates to the Zodiac sign of Capricorn, an Earth Sign. Therefore the power of Earth Consciousness in the Gateways of the New World is very important. At the New Moon, the Sun and Moon are at 2 Degrees, 34 minutes of Capricorn and radiate a perfect opposition to Earth which is aligned in Cancer at 2 Degrees 34 minutes. This powerful opposition reveals the Potential to Occur (Birch/Capricorn) already exist (Oak/Cancer) and are realized. Our human timing field may not reveal that until the vibration of Oak appears in the time-clock of Earth (June/July). Be sure to check into the News Page of www.facesofwomanspirit.com to read about the energy of the New Moon.

In the Mystical Wisdom of *Birch*, we find the number 15 and the Law of Living. In the wisdom of numerology all second digit numbers are reduced to a single number, thus, $1 + 5 = 6$. The most positive alignment of this number brings about: Union, discernment, communication, harmony, health, beauty, love, family. In the power of the Law of Living, we uncover the reality that we are living in multidimensions all at once. We only appear to be living in the 3rd dimension alone, and separated from Source, guardians and souls departed from the Earth plane. As we seek to understand this state of consciousness, we are aware of this activation within our individual selves.

Dimensions of consciousness include: Our personal reality, our subconscious reality, the collective unconscious of our Earthly tribe, the automatic consciousness of the galaxies, and the total and complete consciousness of the Divine. Our dimensions are filled with matter and non-matter. We are experiencing all of it all of the time....we are Living!

Action for Manifestation: Saturnea. The Planetary energy of the Universe is Active and moves our consciousness into performance that allows manifestations to occur. Saturnea brings about energy that will help us bring the Dreams, the Non-Matter into the realm of matter where materialization is seen and the power of Source revealed and utilized. In Saturnea's poem on page 123 of THE FACES OF WOMANSPRIT, A Celtic Oracle of Avalon, mystical wisdom is revealed. The quote, "doorway of the womb..." carries a great secret of the Universe and the timing of the year of the lunar cycle of Birch. It reveals the power of What IS, is developed, contained, and ready to be expelled into matter by the Birthing Process of the Divine.

Saturnea gives way the secret of the individual responsibility to be the Mid-wife. One must follow the edict of the 4-D's:

- Determination to make Holy all your desires is necessary
- Dedication to the Highest Order of your Being is called for
- Discipline to hold yourself accountable in Thought, Emotion and Actions is necessary
- Devotion to the Highest is required

Such honoring of the 4-D's bring you into the Sacred Alliance of your Holiness and presents you with the power to manifest and bring to Earth the Imprint of your Dreams. By honoring these qualities of life, you bring the Flower of the Divine into Full Bloom in the realm of matter.

In the Mystical Wisdom of Saturnea lies the sacred number 21 and the Law of Universality. Again, the two numbers are reduced to one: $2 + 1 = 3$. Encoded in the vibration of number three is the wisdom of the Great Mother and the positive expressions of: Creative conscious, understanding, playful, youthful, mother/child, productive, musical.

The Law of Universality states that each person is a component of Source, is endowed with all the attributes of Source, and can perform the same as Source. It is a reminder that all things are connected to all other things. All Principles of the Universe and All Laws of the Universe are in Existence at once. Nothing is before, nothing is behind, and nothing is in front. All is One and all is happening at One Moment.

The Power Beyond the Year 2012

As Wisdom Keepers of Sacred Knowledge, we use mystical tools to unlock the treasure chest of the Divine Mind and uncover the powers we can experience, express and utilize. The tools that can be used to reveal the sacred wisdom of the Year 2012 is Numerology and Universal Laws.

WomanSpirit again directs that we begin to deduce the wisdom by our language in which we say this year is Two Thousand Twelve (2012). We then add $2 + 0 + 12$ and discover the number 14. This number is reduced as well and becomes the Number 5. We know we are entering the new year through vibrations of the Number 14 which carries the Law of Adaptation and the Number 5 carries the Law of Life Mastery. Further, we are quite aware that humanity has been living the Cycle of Transformation and the Rebirth of a New World throughout Two Thousand Eleven (2011).

As we closely followed the awareness that the Mayan Calendar and its final 4 worlds completed their time cycles on October 28, 2011, we are aware that the Old World or Aeon has completed itself and the New World/New Aeon has begun. Transformation has occurred. We have entered a New Garden and we are the cultivators of this New Age of Being. But we are not alone in this. The Whole Universal Consciousness within us is at work, adapting the changes of consciousness to the vision of Oneness. In the Number 14 we have a secret code from the Cards of the WomanSpirit deck and from the Pathway of the Tree of Life we would find this Face of WomanSpirit. The Card is Elder...the power of Sacred Silence where the Voice of the Divine is heard, directing the New World. The Path on the Tree of Life is the Path of Samekh. Samekh is the Hebrew Letter which means "Support." It reminds us that as we adapt to this new world, we have the Support of the Divine through many agencies. First of all, this support is seen as Angelic

Support. As the Path of Elder/Samekh leads into the Heart of the Tree and the Sphere of Beauty, then we also know we have support of our Highest Self—our Christed Consciousness. Through the Number 5, we can recognize that we have the Power of Mastery within ourselves that leads us into the wisdom of cultivating our garden of this New Era with an intention to know exactly what to do, how to do it, and to do it with a sense of mastery of all skills revealed through our Spirit, Emotions, Mind, Physicality, Ego and Soul.

This promises to be a year of Higher Order Consciousness being used by each of us at our individual level. May we all find the power within to hold to the Light of our Being.

Using Prayer to enter 2012:

WomanSpirit has been directing a very powerful awareness in the word *Prayer* as I have worked with some of my clients. I believe everyone could use this as a means to activate the year ahead with a Higher Intention and with the use of the divination Cards, THE FACES OF WOMANSPiRiT, A Celtic Oracle of Avalon. This can be done in conjunction with the New Moon or even New Year's Day, January 1st, 2012.

The Divine Mother has given this direction of the word Prayer. Stir your cards with a desire to know how you are to pray from something you desire to manifest (either over the lunar month or throughout the lunar year). Before you pull a card, know that you will pull a card for each letter of the word “prayer.” Also review the power behind each letter as we decipher it through Letter Meanings of the Hebrew Alphabet. Once the Cards are pulled (face down), turn them over and take action from the meaning of the Hebrew Letters and also the meaning within the card.

Here is the Hebrew Translation of Each Letter

- P = Peh: The Translation of Peh is “the Human Mouth .” Be sure your Prayer is said out loud. For in sound is the power of manifestation.
- R = Resh: The translation of Resh is “The front part of your head/brain.” The place where you maintain cognitive awareness. Thus, be sure you are fully aware of what you are praying for.
- A = Aleph: The literal translation of Aleph is Ox and means to cultivate life. This, therefore, reminds you to cultivate your prayer with your highest intention, full awareness and the Power of Love (For Aleph carries the vibration of the Law of Love).
- Y = Yod: The translation of Yod is “The Open Hand of God/Goddess.” It reminds you that the Hand of the Divine guides you and is willing for you to take a hold of this Hand to receive direction for the outcome of your prayer.
- E = Heh: The translation of Heh is “The Eye of God/Goddess.” This reminds you that the Vision of the Divine is Forever seeing All that Is and All that Is to Be. In

your prayerfulness, it calls you to See the Full Manifestation of your desires being supplicated through your prayer.

R = Resh: The translation is noted above. In the final R, we call you to use the Law of Regeneration and realize you are regenerating the prayerful desire from land of ethereal existence into the land of manifestation.

Each card that you pull for each letter has a special meaning, therefore, correspond it to the meaning of the letters, and the expression you can give to the wisdom by living it. Be blessed by this process. So far everyone I have shared this with has been whelmed by the sacred knowledge that has come through the process.

Twelve Days of Christmas

I would be remiss if I did not take advantage is the power of the time of year we are aligned with at Full Moon. Of course, it is Christmas. The 12 days of Christmas is not just a song, but the alignment with the Christian Celebration of the Epiphany. Epiphany means the “Vision” of the Sacred and the Awareness of a Higher Meaning. The first Epiphany in the Judeo-Christian world was the Vision of the Wise Men as they looked upon the Child Jesus. In the calendar of today, we honor the 12 days from December 26th through January 6th. Of course, the famous song, The Twelve Days of Christmas, reveals gifts given. This is our time to give 12 gifts to the Higher Consciousness, to the Honor of Jesus who reminded us of the Divine Essence that we are, and of course, to the Divine Birth that continually re-expresses through ourselves each time we have the “Vision,” the Awareness of Who we are.

There is a theory (unproven) that the song of the 12 days of Christmas may hold a secret to remembering sacred realities. It is stated that this song may have been created by Catholics in England when they were, by Law of the Anglican government, denied practice of their religious beliefs.

The First Day:	The Partridge in a Pear Tree:	The birth of Jesus—a Christed Being
The Second Day:	Two Turtle Doves:	Honoring the Old and New Testament of the Biblical Scriptures
The Third Day:	Three French Horns:	Faith, Hope and Charity
The Fourth Day:	Four Colly Birds:	The Four Gospels/Evangelists
The Fifth Day:	Five Golden Rings:	First Five Books of the Old Testament revealing the History of Humanities Evolution of Separation
The Sixth Day:	Six Geese a Laying:	Six Days of Creation

The Seventh Day:	Seven Swans a-swimming:	Seven Sacraments (Baptism, Communion, Reconciliation, Confirmation, Marriage, Holy Orders, Last Rites)
The Eighth Day:	Eight Maids a-Milking:	Eight Beatitudes
The Ninth Day:	Nine Ladies Dancing:	Nine Fruits of the Holy Spirit Love, Joy, Peace, Forbearance, Kindness, Goodness, Faithfulness, Gentleness, Self Control.
The Tenth Day:	Ten Lords a-leaping:	Ten Commandments
The Eleventh Day:	Eleven Pipers Piping:	Eleven Faithful Apostles (All except Judas because of his act of betrayal)
The Twelfth Day:	Twelve Drummers Drumming:	The 12 Points of the Doctrine of the Apostles Creed

What can you do as the 12 days of Christmas Unfold to the Epiphany of your Awareness that you are the Christed Child? How about living consciously twelve Universal Laws, one each day with reverent attentiveness?

0. The Law of Love. This is Sacred Law. It represents the true nature of the Universe. It encompasses all forms of existence, is nonjudgmental, constant, perfect and unchangeable. It asks that you hold all life sacred and come from a space of love when dealing with all aspects of your existence.

This law is a perfect form of Love. It does not seek to love, it is Love. It does not seek recognition through Love, it is Love. It is the purest form of Universal Affection for all existence. It does remind us that the Universe/Source does not hold back on loving Its creation(s). It is a Grace to All of us....we are loved unconditionally and most certainly without any judgment by the Divine!

The Law of Expression. From the onset of the Logos (Word of God/Goddess) Expression exists. The Divine is in constant expression through all living things. Expression is the power of Source creating, manifesting and delivering the meaning of all life. It is an encoded empowerment within all living creatures to Express and identify itself through its expression. Whether through thought, word or deed, an expression is always occurring

The Law of Wisdom. This law flows and reveals that the expression of containment and the synthesis of opposites produces a body of knowledge. This body of knowledge develops within the synthesis. It is expressed through the quality of being discerning, educated, and possessing the ability to become aware of the unknowable known (Universal Mysteries)

The Law of Creative Imagination. This law states: The Universe was built through the Eye of God/Goddess and the vision of What Is, Was, and is Yet To Be. This is a power of Creative Imagination. All souls are encoded with the power of Creative Imagination and the ability to build their experiences through vision-imaging that stirs the power of creation. Humanity uses this law to co-create. It is humanities most powerful force to use and instigate new constructions in the mind and emotions to transform old patterns and establish new ones, therefore constantly creating new realities of one's existence.

Law of Worldly Development. This law reiterates the choice of Source to manifest itself through the corridors of Matter. The Universal impulse creates the quiver of positive and negative poles, instigating the power of contracting and repelling vibrations that stimulate the current of action and materialization.

Law of Life Mastery. The Conscious Mind and the Subconscious mind work together and function in harmony. This harmony empowers the individual and creates the ability to express skill and proficiency in one or more areas of Life. Life Mastery is the process of becoming harmonious, skillful and proficient in all areas of Life. The aim of the soul, through the human form, is to Master its 3rd dimension reality.

Law of Union. This law provides the wisdom that everything (matter or nonmatter) is made of the one atom—the Atom of Source. Therefore, everything is in Union by nature. We are all One Cell expressing individual qualities of The Cell: Source. We are God/Goddess in Matter and Self in the NonMatter of God/Goddess. We are the Living Source and, individually, we effect each other. We effect Source and Source effects us. We are never separate from Source, we are in constant and everlasting Union.

Law of Containment. This law states, Energy is abundant passive and active frequencies. In order to manifest the expression of contrasting energetic qualities, a synthesis must occur from within a boundary-less boundary of the Universe. By the containment of the active and passive energies, a synthesis occurs and the result is a manifested reality that is greater than the sum of the two.

Law of Self Dominion. This law is inscribed within each soul and releases the ability to be self-governing, live in harmony with the Supreme Power and Authority that exists within itself and its environment. Use of this law opens the doorway to the revelation of secrets—the Secrets of the Universe as well as yourself.

The Law of Wholeness. This law reveals the constant truth that every soul is contained in the existence of All that Is; All that Is, is contained in every soul. Every person, animal, plant, mineral and galactic essence is complete in and of itself, and therefore Whole.

Law of Contraction and Expansion: This Law supports the vibration that whatever is within must come out and what is out must come in. Contraction provides the power to come within, listen to the Higher Wisdom, transform what has been experienced and expand out again. This expansion provides a new form, and an ability to depict and live at yet another level of the Whole. In order to

understand and define this law within our lives, we must look at the powers of contraction and expansion and “grasp” the wisdom.

The Law of Cause and Effect (Also known as the Law of Karma). “For every action there is a reaction, equal in force but opposite by nature.” This is the law we are constantly using to manifest our reality.

May your 12 days of Christmas bring you many gifts as you gift to the Universe your use of your higher awareness.

There is a lot to contemplate as you enter the New Moon/New Year. May the contemplation prove to be the most sacred for your intentions to birth, cultivate and create in the New World/New Age.

I wish you all a very sacred time as you journey through the Holidays and enter the Blessed Year of your Highest Intentions to Cultivate the Garden of a New World for yourself, for humanity and as the Reflection of Source Intention that YOU ARE!

Love and Light in the Grace of Be-ing,

Katherine

New Moon - Dec 24

Crescent Moon - Dec 27

First Quarter Moon - Dec 31

Gibbous Moon - Jan 8

Full Moon - Jan 8

Disseminating Moon - Jan 12

Last Quarter Moon - Jan 16

Balsamic Moon - Jan 19

Next New Moon: January 22, 2012
